THE TRIBUNE for 1861

PROSPECTUS.

The XXth Volume of THE WEEKLY TRIBUNE commenced with the issue of Sept. I. During the past year THE TRIBUNE, has been obliged to devote quite a large proportion of its space to Politics, but we shall soon be able to forego Political discussion almost entirely, for months if not for years, and devote nearly all our columns to subjects of less intense, but more abiding, interest. Among these, we mean to pay especial attention to.

abiding, interest. Among these, we mean to pay experience tion to

1. EDUCATION.—The whole subject of Education, both Popular and General, will be discussed in our columns throughout the year 1501, and we hope to enlist in that discussion some of the profoundest thinkers and the ablest instructors in our country. It is at once our hope and our recolve that the cause of Education shall receive an impetus from the exertions of THE TRIBUNE in its behalf during the year 1801.

11. AGRICULTURE.—We have been compelled to restrict our elucidations of this great interest throughout 1800, and shall endeavor to atone therefor in 1301. Windever discovery, dodastion, demonstration, is calculated to render the reward of labor devoted to cultivation more ample or more certain, shall receive prempt and full attention.

tion, demonstration, is calculated to remore the roward or anodeword to cultivation more ample or more certain, shall receive prempt and full attention.

111.—MANUFACTURES, &c.—We hall every invention or enterprise whereby American Capital and Labor are attracted to and advantageously employed in any department of Manufacturing or Mechanical Industry as a real contribution to the Public Weal, insuring ampler, steadler, more convenient, more remunerating numbers to the Farmer, with fuller employment and better wages to the Laborer. The Progress of Mindag, frommaking, Steel-making, Cloth-weaving, &c., &c., in our country, and the world, shall be watched and reported by us with an earnest and active sympathy.

1V. FORELIGN AFFAIRS,—We employ the best correspondents in London, Parls, Tarin, Berlin, and other European capitals, to transmit us early and accurate advices of the great changes there aliently but certainty preparing. In spite of the pressure of Domestic Politics, our News from the Old World's now varied and ample; but we shall have to render it more perfect during the eventual year just before us.

V.—HOME, NEWS.—We compley regular paid correspondents in California, at the tstimus of Darlen, in the Rocky Monntein Gold Region, and wherever else they seem requisite. From the more accessible portions of our country, we derive our information mainly from the multifactions correspondents of the Associated Press, from our exchanges, and the occasional lattern of intelligent friends. We saim to print the changes of great newspayer, with the fullest and most authentic summery of useful intelligent friends. We saim to print the changes of great newspayer, with the fullest and most authentic summery of useful intelligent friends. We saim to print the changes of great newspayer, with the fullest and most authentic summery of useful intelligent friends. We saim to print the changes of great paid each day a critic on the last," and print a better and better paid from year to year, as our means are steedly enlarged th

MISCELLANEOUS.

In most instances the pain is in the front of the head, over one to both eye, and sometimes provoking woniting; under this class may also be named Neuralgia.

For the treatment of either class of Headache, the Cephalle Pills have been found a sure and safe remesty, relieving the most acute pains in a few minutes, and by its subtle power enalizating the diseases of which Headache is the unerring index.

originating in carelessness, or sedentary habits; it is regulars a slight disorder of too little consequence to excite anxiety, while in reality it is the preemrer and companion of many of the most fatal and dangerous diseases, and unless early eradicated it will bring the suffers to an utimely grave. Among the lighter evils of which contiveness is the usual attendant are Headache, Colio, Rheumatism, Fool Breath, Files, and others of fike nature, while a long train of frightful diseases such as Malignant Fevers, Abcesses, Dysentery, Diarrhea, Dyspepsia, Apoplexy, Egilepty, Paralyels, Hysteria, Hypochoudrinais, Melancholy and insastiy, first indicate their presence to the system by this alarming symptom. Not unfrquently the diseases named originate in Constigation, but take on an independent existence unless the cause is readicated in an early stage. From all these considerations it follows that the disorder should receive immediate attention whenever it occurs, and no person should neglect to get a box of Cephalic Pills on the first appearance of the complaint, as their timely use will expel the insiduous approaches of disease and destroy this dangerous foe to human life.
